(7) Summary of Significant Accounting Policies

The consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America.

(a) Marketable Securities
    SFAS No. 115, “Accounting for Certain Investments in Debt and Equity Securities” has been adopted in the Consolidated Statement of Stockholder’s Equity for the first half of fiscal 2001. Accordingly, the Consolidated Statement of Stockholder’s Equity has been restated for fiscal 2000.

(b) Inventories
    Inventories are stated at the lower of cost or market. Cost is determined principally by the average method.

(c) Depreciation
    Depreciation of property, plant, and equipment is principally computed by the declining-balance method for assets located in Japan and of certain foreign subsidiaries and by the straight-line method for assets of other foreign subsidiaries based on estimated useful lives.

(d) Income Taxes
    Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards.
