4) Notes to Consolidated Financial Statements (Unaudited)

1. Summary of Significant Accounting Policies

(a) Basis of Presentation

TDK Corporation and most of its domestic subsidiaries maintain their books of account in conformity with the generally accepted accounting principles in Japan, and its foreign subsidiaries mainly in conformity with those of the countries of their domicile.

The consolidated financial statements presented herein reflect certain adjustments, not recorded in the primary books of TDK Corporation and subsidiaries, to present the financial position, results of operations and cash flows in conformity with U.S. generally accepted accounting principles ("U.S. GAAP").

(b) Consolidation Policy

The consolidated financial statements include the accounts of TDK Corporation, its subsidiaries and those variable interest entities where TDK is the primary beneficiary under U.S. GAAP. All significant intercompany balances and transactions have been eliminated in consolidation.

The investments in affiliates in which TDK's ownership is 20 percent to 50 percent and where TDK exercises significant influence over their operating and financial policies are accounted for by the equity method of accounting. All significant intercompany profits from these affiliates have been eliminated.

(c) Subsequent Events

TDK has evaluated the subsequent events through February 12, 2015, the date on which the consolidated financial statements are available to be issued.

(d) Reclassifications

Certain reclassifications have been made to the prior year's consolidated financial statements and quarterly consolidated financial statements to conform to the presentation used for the nine-month and the three-month ended December 31, 2014.

Additionally, results of discontinued operations are separately presented under discontinued operations in the consolidated statements of income. Except for otherwise mentioned, figures pertaining to discontinued operations are excluded from the figures disclosed in the Notes to Consolidated Financial Statements.

5. Contingent Liabilities

TDK provides guarantees to third parties on bank loans of its employees. The guarantees on behalf of the employees are made for their housing loans. For each guarantee issued, in the event the employee defaults on payment, TDK would be required to make payments under its guarantee.

The maximum amount of undiscounted payments TDK would have to make in the event of default at March 31, 2014 and December 31, 2014, are as follows:

	Yen (Millions)		
	March 31, 2014 December 31, 20		
Guarantees to third parties on bank loans			
of employees	¥ 1,870	¥ 1,606	

As of December 31, 2014, the liability recognized for the estimated fair value of TDK's obligation under the guarantee arrangement is not material.

Several claims against TDK are pending. A provision has been made for the estimated liabilities for the items. In the opinion of TDK management, based on discussions with legal counsel, any additional liability not currently provided for will not materially affect the consolidated financial position or results of operations of TDK.

6. Risk Management Activities and Derivative Financial Instruments

TDK operates internationally and is exposed to the risk of changes in foreign exchange rates and changes in raw material prices. TDK assesses these risks by continuously monitoring changes in the exchange rates and raw material prices and by evaluating hedging opportunities. Derivative financial instruments are utilized to reduce these risks. TDK does not hold or issue derivative financial instruments for trading purposes. TDK is exposed to credit related losses in the event of nonperformance by the counterparties to those derivative financial instruments, but does not expect any counterparties to fail to meet their obligations given their high credit ratings. The credit exposure of those financial instruments is represented by the fair values of contracts. The fair values of the contracts are calculated based on the quotes presented by financial institutions.

TDK uses forward foreign exchange contracts and currency swaps in order to offset foreign exchange gain (loss) mainly arising from foreign-currency denominated assets and liabilities and forecasted transactions. Also, TDK uses commodity forward transactions in order to control the fluctuation risks of raw material prices. Although these contracts are not designated as hedges, which is required to apply hedge accountings, TDK considers they are effective as hedges from an economic viewpoint. The fair values of these undesignated contracts are recognized as income or expenses as earned or incurred.

7. Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of financial instruments in cases for which it is practicable:

(a) Cash and cash equivalents, Short-term investments, Trade receivables, Other current assets, Short-term debt, Trade payables, Accrued expenses and Other current liabilities

Except for derivative financial instruments, the carrying amount approximates fair value because of the short maturity of these instruments.

(b) Marketable securities and Investments in securities

The fair values of marketable securities and investments in securities are primarily estimated based on quoted market prices for these instruments.

(c) Long-term debt

The fair value of TDK's long-term debt is estimated based on the amount of future cash flows associated with the instrument discounted using TDK's current borrowing rate for similar debt of comparable maturity, or based on the quoted market prices for the same or similar issues. The long-term debt is classified as level 2, one of the three levels of fair value hierarchy that is discussed in Note 8 of the Notes to Consolidated Financial Statements.

The carrying amounts and estimated fair values of TDK's financial instruments at March 31, 2014 and December 31, 2014, are summarized as follows:

As of March 21, 2014	Yen (Millions)			
As of March 31, 2014	Carrying amount	Estimated fair value		
Assets: Investments in securities and other assets	¥ 34,519	¥ 34,519		
Liability: Long-term debt, including current portion (excluding lease obligation)	(128,185)	(129,382)		
As of December 31, 2014	Yen (Natural Yen) Carrying amount	Millions) Estimated fair value		
Assets:	Carrying amount	Estimated fair value		
Marketable securities Investments in securities and other assets	¥ 1,302 63,078	¥ 1,302 63,078		
Liability: Long-term debt, including current portion (excluding lease obligation)	(154,942)	(156,308)		

Derivative financial instruments are presented in Note 6 of the Notes to Consolidated Financial Statements.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

8. Fair Value Measurements

The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820 "Fair Value Measurements and Disclosures" defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or most advantageous market for the asset or liability. FASB ASC 820 establishes a three-level fair value hierarchy for material inputs used in measuring fair value as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that TDK has the ability to access at the measurement date
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3: Unobservable inputs for the asset or liability

Assets and liabilities that are measured at fair value on a recurring basis

Assets and liabilities that are measured at fair value on a recurring basis as of March 31, 2014 and December 31, 2014 are as follows:

Level 1 marketable securities and investments are valued using unadjusted quoted prices in active markets in which transactions occur with sufficient frequency and volume. Rabbi trusts investments included in other assets in which a part of the employees' salary is deposited is valued using unadjusted quoted prices in active markets.

Level 2 derivative contracts include forward foreign exchange contracts, currency swaps and commodity forward transactions that are valued based on quotes obtained from counterparties and are verified using observable market inputs, such as foreign currency exchange rates and raw material price. Investments consist of commercial papers and the fair values thereof are based on third-party assessments using observable market data.

Assets and liabilities that are measured at fair value on a nonrecurring basis

The fair values measured on a nonrecurring basis for the nine-month ended December 31, 2014 is as follows:

Nine months ended	Yen (Millions)			
December 31, 2014	Total gains (losses)	Level 1	Level 2	Level 3
Assets:				
Investments (Equity securities)	¥ (150)	¥ -	¥ -	¥ -
Long-lived assets (Property, plant and equipment)	(3,082)	-	-	3,411
Long-lived assets (Intangible assets)	(368)	-	-	279
Goodwill	(2,247)	-	-	4,417

For the nine-month ended December 31, 2014, investments which consist of nonmarketable securities valued using the cost method with the book value of \$150 million was fully written down due to impairment. The book value of long-lived assets (property, plant and equipment) of \$6,493 million was written down to its fair value of \$3,411 million, and the book value of long-lived assets (intangible assets) of \$647 million was written down to its fair value of \$279 million due to impairment. The fair value of these long-lived assets was determined mainly based on the discounted future cash flows expected from the use of each of the assets. According to discounted cash flow method, guideline public company method and guideline merged and acquired company method, the book value of goodwill of \$6,664 million was written down to its fair value of \$4,417 million due to impairment. These fair values are classified as Level 3 because they were determined using unobservable inputs.

As a result of the above, impairment losses of ¥5,847 million caused by other-than-temporary declines in fair values during the nine-month ended December 31, 2014 were included in the consolidated statements of income.

9. Impairment of Long-lived Assets

For the nine-month ended December 31, 2014, impairment losses of ¥3,450 million were recognized. This is the result of a reduction of the carrying value of the long-lived assets to the fair value because of a reduction in profitability derived from lower demand.

The impairment losses are included in selling, general and administrative expenses in the consolidated statements of income.

For the nine-month ended December 31, 2014, the impairment losses include ¥374 million for the Passive Components segment, ¥3,076 million for the Magnetic Application Product segment.

No significant intangible assets other than goodwill were acquired in the nine-month ended December 31, 2013 and December 31, 2014.

For the nine-month ended December 31, 2014, an impairment loss of ¥2,247 million on goodwill was recognized as a result of reviewing the profitability expected in future by the external environment change in power supplies market. The fair value was measured according to discounted cash flow method, guideline public company method and guideline merged and acquired company method. The impairment loss is included in selling, general and administrative expenses in the consolidated statements of income.

For the nine-month and the three-month ended December 31, 2013, incremental 201,000 and 225,000 shares arising from the exercise of stock options were excluded from the per share calculation of diluted loss from discontinued operations attributable to TDK as the effect would have been antidilutive.

The decline of income from continuing operations attributable to TDK and net income attributable to TDK for the nine-month and the three-month ended December 31, 2013 and December 31, 2014 were caused by a dilutive effect of stock options issued by a subsidiary of TDK Corporation.

Per common share data are calculated separately for income from continuing operations attributable to TDK, loss from discontinued operations attributable to TDK and net income attributable to TDK. Consequently diluted net income attributable to TDK per share for the nine-month and the three-month ended December 31, 2013 were not equal to the sum of diluted income from continuing operations attributable to TDK per share and loss from discontinued operations attributable to TDK per share.

For the nine-month and the three-month ended December 31, 2013 and December 31, 2014, certain stock options issued by TDK Corporation were excluded from the diluted per share calculation of income from continuing operations attributable to TDK, loss from discontinued operations attributable to TDK, and net income attributable to TDK as the effect would have been antidilutive. The stock options issued by a subsidiary that are vested when a certain performance condition is achieved were also excluded from the diluted per share calculation of income from continuing operations attributable to TDK and net income attributable to TDK for the nine-month and the three-month ended December 31, 2013 and December 31, 2014 as it was not probable that the performance condition would be achieved as of December 31, 2013 and December 31, 2014.

14. Discontinued Operations

As a part of reviewing the entire group portfolio and concentration in core competence, TDK withdrew from the data tape business and the blu-ray business, both of which belonged to the Film Application Products segment, during the year ended March 31, 2014.

In accordance with the provisions of FASB ASC 205-20, "Presentation of Financial Statements-Discontinued Operations", profit and loss pertaining to the data tape business and the blu-ray business are presented under discontinued operations in the consolidated statements of income.

The selected financial information for the discontinued operations for the nine-month and the three-month ended December 31, 2013 are as follows and nil for the nine-month and the three-month ended December 31, 2014.

15. Segment Information

Business Segment Information

Operating segments are components of TDK for which discrete financial information is available and whose operating results are regularly reviewed by management to make decisions about resources to be allocated to the segment and assess its performance.

Multiple operating segments that have similarities, including type and nature of products, production process, market and so on, are aggregated into the Passive Components segment, the Magnetic Application Products segment and the Film Application Products segment. Operating segments which are not reportable segments are included in Other.

In accordance with the provisions of FASB ASC 205-20, "Presentation of Financial Statements-Discontinued Operations", figures pertaining to the data tape business and the blu-ray business, both of which became discontinued operations in the year ended March 31, 2014, are excluded.

Principal businesses of each segment are as follows:

Segment	Principal businesses
Passive Components	Ceramic capacitors, Aluminum electrolytic capacitors, Film capacitors, Inductive devices (Coils, Ferrite cores and Transformers), High-frequency components, Piezoelectric materials and circuit protection components, Sensors
Magnetic Application Products	Recording devices, Power supplies, Magnets
Film Application Products	Energy devices (Rechargeable batteries), Applied films
Other	Mechatronics (Production equipment), other

Intersegment transactions in operating segments are based on arm's-length prices.
