1. Summary Information Regarding Business Results

(1) Summary Information Regarding Consolidated Business Results for the First Quarter of FY March 2026

Consolidated results for the first three months of FY March 2026, the period from April 1 to June 30, 2025, are as follows.

In the first three months of the FY March 2026, the global economy remained significantly unstable due to intensifying trade friction, growing uncertainty regarding tariff policies, and rising geopolitical risks in the Middle East. Exchange rates showed a significant appreciation of the yen against both the dollar and the euro year on year.

In the electronic components market, which has a significant impact on TDK's consolidated business results, the production of ICT (Information and Communication Technology) related products, particularly smartphones, remained strong on a year-on-year basis. The demand for nearline hard disk drives (HDDs) for data centers also remained robust. On the other hand, in the industrial equipment market, overall capital investment demand remained sluggish. In the automotive market, the demand for battery electric vehicles (BEVs) has continued to decline, resulting in lower parts demand than forecasted at the beginning of the current fiscal year.

In this business environment, during the first quarter, the Sensor Application Products and Energy Application Products segments experienced an increase in sales year on year, mainly driven by a recovery in demand for components in the ICT market and the industrial equipment market. However, the Passive Components segment experienced a decline in sales due to a slowdown in sales of the products for the automotive market. As a result, consolidated net sales for the first three months came to 535,735 million yen, up 3.3% year on year.

In terms of profits, due to the appreciation of the yen and a decrease in shipments of automotive market products, operating profit decreased by 2.5% to 56,419 million yen compared to the same quarter last year; profit before tax decreased by 17.2% to 57,630 million; and net profit attributable to owners of parent was 41,462 million yen, a decrease of 30.5% year on year.

(3) Fundamental Policy for Distribution of Earnings, and FY March 2026 Dividends

TDK recognizes that achieving increase in corporate value over the medium- and long-term ultimately translates into higher shareholder value. In line with this understanding, TDK's fundamental policy is to work to consistently increase dividends through growth in earnings per share. In addition, since the start of Medium-term Plan from FY March 2025, TDK has adopted a shareholder return policy that aims for a dividend payout ratio of 35%. Under these policies, TDK actively reinvests its earning in business activities and determines its dividends taking into consideration comprehensive factors, including return on equity (ROE) and dividends on equity (DOE) on a consolidated basis, as well as changes in the business environment, among other factors.

Projected dividends per share for FY March 2026 are as follows. TDK keeps initial dividend forecast unchanged. TDK split one share of its common stock into five shares with the effective date of October 1, 2024.

(Segment information)

1. Description of reportable segments

TDK Group's operating segments are components of the group for which discrete financial information is available and whose operating results are regularly reviewed by management to make decisions about resources to be allocated to the segment and assess its performance.

TDK Group aggregates its operating segments into the following four reportable segments: Passive Components, Sensor Application Products, Magnetic Application Products, and Energy Application Products, based on the similarities in the type and nature of products, the nature of production processes, markets to distribute products, economic indicators and other characteristics. Operating segments which are not classified as one of these four reportable segments are included in Other.

Principal businesses and products of reportable segments and Other segment are as follows:

Segment	Principal businesses and products
Passive Components	Ceramic Capacitors, Aluminum Electrolytic Capacitors, Film Capacitors, Inductive Devices (Coils/Ferrite Cores/Transformers), High-Frequency Devices, Piezoelectric Material Products, Circuit Protection Components
Sensor Application Products	Temperature and Pressure Sensors, Magnetic Sensors, MEMS Sensors
Magnetic Application Products	HDD Heads, HDD Suspension Assemblies, Magnets
Energy Application Products	Energy Devices (Rechargeable Batteries), Power Supplies
Other	Mechatronics (Production Equipment), Camera Module Micro Actuators for smartphones, etc.

Accounting policies applied to each segment are the same as those for the condensed quarterly consolidated financial statements of TDK Group. Intersegment transactions are based on arm's length prices.
