Dear Business Partners

Subject: Request for cooperation regarding PFAS (organic fluorine compounds) information

We would like to express our sincere gratitude for your cooperation in TDK's green procurement activities.

Currently, various discussions are being held in Europe, the United States, and other parts of the world to regulate PFAS (per- and polyfluoroalkyl substances)\*. As you already know, PFAS are listed in Appendix 1 of the TDK Green Procurement Standards as substances that need to be reported to TDK.

The chemSHERPA, communication tool for chemical substance information provided by the CMP Consortium (formerly the Joint Article Management Promotion consortium; JAMP) already includes various PFAS within its system. Suppliers are now able to provide PFAS information contained in our purchased items.

Therefore, we kindly ask for your cooperation with the following.

#### **(Request)**

If PFAS information is missing in the chemical substance information you have already submitted to our company, please fill in PFAS information in the latest version of chemSHERPA and submit it to the email address below.

(In the following cases, there is no need to re-implement the procedure.)

- If it does not contain PFAS
- If you have already submitted chemSHERPA with PFAS to TDK.

#### **(Contact Information)**

For inquiries, please contact us at the email address below.
