

TDK Investor Day 2026

**To Enhancement of
Corporate Value through
Pre-Financial Capital**

**TDK Corporation
IR&SR Group, Corporate Strategy HQ
September 1, 2026**

Agenda

- 1. Opening Remarks**
- 2. CHRO Session**
Human Capital Management
- 3. CTO Session**
Cutting-edge Technology
- 4. Closing Remarks**

Opening Remarks

Noboru Saito,
President & CEO

My Commitment as President & CEO

- We have formulated our vision of what we want to be 10 years from now (Long-term Vision). We have back-casted from our vision for 10 years to identify the path to enhancing our corporate value.

▼ Today's Topic

- **Based on our materials × process × software technologies, we will become the No.1 partner for our world-wide customers and accelerate social transformation for a sustainable future.**
- We will enhance our business portfolio management, increase the spread between ROIC and WACC, increase cash flows, improve capital efficiency, and strengthen business management to increase financial capital.

▼ Today's Topic

- **We will evolve the Ferrite Tree and reinforce business management to increase pre-financial capital, which is the source of future cash flows.**
- We will focus more on investor dialogue and investor relations.

Pre-Financial Capital Supporting the Long-term Vision

Long-term Vision “TDK Transformation” TDK’s Business Model

Capability of
management transformation

Strategic position

Key Issues (materiality)

Value Creation and Establishment
of Competitive Advantage
through Business Activities

Create Customer Value and
Build Strong Relationships

Contribute to Social
Transformation through R&D

Stabilize Supply of High-quality
Products and Increase
Production Efficiency

Strengthening of the
Management Foundation that
Envisions and Realizes the Future

Transformation through
Promoting and Cultivating
Diverse Pool of Human
Resources to Further Enhance
Competitive Advantage

Advance Group Governance

Address Environmental and
Social Issues

Medium-term Plan

1

**Strengthen
Management Focusing
on Cash Flows**

2

**Enhance Business
Portfolio Management
(Emphasizing ROIC)**

3

**Evolve the Ferrite Tree
(Pre-financial Capital)**

Human Resources Strategy

Three Key Initiatives

- Enhancement in Human Capital as a Change Driver
- Strengthening in Value Creation through TDK United
- Advancement in Technical Capability

Five Pillars of Strategy Execution

"RENDO" Alignment of HR Strategy with Corporate Strategy

TDK's Business Model

As the talent portfolio should be

● Strengthening the talent

Who drive the business transformation /
Who drive the innovation / Who is capable
of AI/Software / Who can provide solution /
Who has exceptional monozukuri
(manufacturing experience)

Management issues

- Strengthen existing businesses
- Business portfolio transformation
Leveraging innovation / Strengthening software
technology / Strengthening solution business

Human Resources Strategy

Three Key Initiatives

- Enhancement in Human Capital as a Change Driver
- Strengthening in Value Creation through TDK United
- Advancement in Technical Capability

Five Pillars of Strategy Execution

Toward Realizing Our Mid- to Long-term Target State

We will further advance our business portfolio management by pursuing both organic and inorganic growth.

We Will Help Boost Sales for the Entire AI Ecosystem

Sales for AI Market (FY3/26 Actual - FY3/31 Target)

Human Capital Management, Fueling Innovation & Inclusive Growth

*The target is a three-year cumulative number in the current Medium-term Plan

Outcome of Cross Functional and International GMDP Training

GMDP build not only a global leadership pipeline but also business models.

Internal incubator program and SensEI was established through **GEMP**(**G**lobal **E**xecutive **M**anagement **P**rogram).

“TDK LaunchEngine”- In-House Incubator Program

At TDK, we take on the challenge of creating new value by applying our entrepreneurial spirit across organizational hierarchies, job titles, and operational roles.

Two companies through In-House incubation program

DENPAFLUX

Previously mitai

Industry's first interactive EMC visualization platform

PFASUIKI

Develops sustainable technologies that permanently destroy PFAS — the toxic 'forever chemicals' — tackling one of today's toughest environmental challenges.

SensEI

SensEI was established by outside the Sensor business group from GEMP.

Employer Branding Initiatives

Employer branding communicates our values, impact, and growth opportunities as an employer. It helps engage current team members, attract job seekers, and foster collaboration across locations.

RENDO, alignment

Three outcome

- Becoming an employer of choice for job seekers
- Giving team members reasons to stay and grow at TDK
- Strengthening the human resources pipeline for management

Four targets

- Establishing a Truly Unified Global Identity
- Consistency of Messaging in the Global Market
- Clearly Communicating Our Appeal as an Employer
- Building Long-Term Trust

Employer Branding is not merely a communication initiative. It is a strategic business lever that drives competitiveness and sustainable growth.

We Improved the Ranking in Japan and Germany

Ranked 100th in Toyokeizai's Top Employers Ranking in 2027 Graduates.

TDK ranked 100th in Toyokeizai's "Most Popular Companies Among 2027 Graduates" ranking. Having risen steadily from 273rd in 2024 and 194th in 2025, TDK continues to gain recognition and appeal among students.

**2026=graduates in March 2027.

Top Employer in Germany

For the fourth time in a row, TDK was qualified as a Top Employer in Germany. The Top Employers Institute evaluates companies in around 20 HR areas, including People Strategy, Working Environment, Talent Acquisition, Learning, Well-being and Diversity & Inclusion.

Developing Software Talent for AI Ecosystem Value Creation

Software and AI are core capabilities driving our business model transformation. We are securing sustainable growth and creating value through global recruitment, talent development, and organizational structuring.

Expanding products for the AI ecosystem

Strengthening talent to underpin software technology

HR strategy supporting our growth strategy

TDK's Business Model

AI Initiatives in Four Domains for Strengthening Solutions

AI for Market Creation

Expanding products for the AI ecosystem, focusing on the rapidly growing AI data center market

AI for Value Enhancement

Deploying solutions driven by AI-equipped sensor devices

AI for R&D

AI-Driven acceleration of materials development: shortening timelines and enhancing R&D productivity

AI for Operational Efficiency

Leveraging the TDK GenAI platform to enhance productivity across the TDK Group

Advancing Materials Development with Materials Informatics (MI)

Accelerating new material and product development using our proprietary material × process technologies and "Aim" AI data analysis.

Proprietary Material & Process Data

Accumulating a wide range of data, from materials and processes to properties and evaluations.

Composition

Process

Microstructures

Characteristics

In-House MI Analysis Tool

Contribution to Physical AI

Physical AI will boost demand for TDK components.
TDK aims to expand its solution business in Physical AI.

Physical AI Product Growth

2026 Grandview Physical AI Market

Growth Strategy for SensEI

Partnership with and integration of AWS IoT tools and secure cloud services into TDK SensEI's edgeRX™ platform advances beyond CbM** to unlock additional value through PdM*** and Autonomous Prescriptive Maintenance via edgeRX™ Agents

Business strategy

- Complete Solutions: HW + SW + Cloud + Edge AI
- Hybrid Edge + Cloud AI unlocks additional value
- Multiple sensor types (Vibration, Temperature, Magnetometer, Motion, Sound, Images)
- Advances beyond CbM** to PdM*** + Autonomous Prescriptive Maintenance

Market size of predictive maintenance

(US\$ bn)

Source: Markets & Markets PdM 2024

Requirement from market

- Cloud light
- Sensor device with higher intelligence
- Multiple function sensors not only vibration & temperature
- Agility
- Manufacturing capability

*AWS= Amazon Web Services, Inc. **CbM = Condition Based Maintenance ***PdM = Predictive Maintenance

Market Landscape

TDK SensEI's edgeRX™ platform is an easy-to-deploy, intelligent edge AI solution because it combines hardware, software, and AI models into a single all-in-one platform that runs directly on edge devices

Industrial Health Monitoring for Machines & Products

Offers an Edge AI platform, complete with the tools, services, expertise, and systems to transform industrial operations. – Reducing Costs, Maximizing Uptime & throughput, AI Powered Visibility

Reduce Costs

Continuously monitor machines and product to identify problems before costs escalate.

Maximize Uptime & Throughput

Maximize machine uptime and maintain high product throughput by predicting and preventing issues with AI.

AI Powered Visibility

Monitor machines and products from anywhere to optimize industrial operations.

Growth Strategy for Smart Glasses Business

By acquiring SoftEye and establishing AR platforms BD, we aim to expand our product lineup and pursue growth.

Business strategy

- TDK addressed eye-intent/tracking solution by acquiring SoftEye technology.
- Establishment of AR Platforms BD.
- We combine our custom chips and software with TDK components efficiently. This platforms will showcase AI Glasses user experiences that customers can commercialize and scale effectively.
- FCLM, MEMS mirror, Micro actuator, Battery tech, IMU, Mic are key to an "Smart glasses Solution."
- TDK plans to provide an "AR Engine" with display controller + hub & lite app processing in about two year.

Requirement from market

- Usability - low power enables all day battery life
- Comfort – smaller battery enables smaller & lighter form factors
- Fashionable – smaller & lighter form factors enable fashionable designs
- Scalable – retinal projection requires no modification to prescription lens

Market size and growth rate of smart glasses

Seamless Input Technology

Context Awareness is Key to Personalized AI

AI

Key moment detection by sensor fusion

- **Eye camera:** User's intent or interest
- **Contextual Sensor:** Detects objects
- **AI DSP*:** Efficient CNN** processor
- **Hi-Res camera:** Detailed data on RoI
- **IMU:** Head position, motion, gesture
- **Mic:** Ambient sounds, voice / Command

Context Aware Data Capture

- From moments to contextual events
 - "Parking lot: car in B3 03"
 - "Location: Entered espresso bar"
 - "Social: met Peter"
 - "Cafe: espresso for 30 min"

Personalized Memory

- From memory to assistance
 - Extended memory:**
 - "Who did I meet at last year's CES?"
 - Insight:**
 - "Evaluate my eating habit"
 - Personalized Agent**
 - "Book a dinner place I'd like."

*DSP = Digital Signal Processor **CNN = Convolutional Neural Network

Solution for Seamless User Interactions

Intuitive Interactions with Display & Audio

Glance down

Growth Strategy for SensorGPT™

Synthetic data generation fueling the future of Physical AI

Solution Benefits

- 80% effort to create an AI application is spent on data collection and curation
- Reduces the need for a fleet of data collection engineers
- Significantly increase scale of available data
- Reduces real data needed for ML models down to 20%

Physical AI Market (Software)

Source: Grand View Research – Physical AI market 2026

Requirement from market

- Scalable – must be able to support a large portfolio of different sensors
- Sensor Agnostic – data should work amongst all major manufacturers
- Financial Benefits – must be able to do “more” for “less” than current data collection procedures
- Usability – UX must be easy to navigate and implement

Growth Strategy for Advanced Metal 3D Printing Technology

(Electro-chemical Additive Manufacturing; ECAM)

Plan to enter Data Center thermal management market after closing of Fabric8Labs acquisition (subject to customary closing conditions, including regulatory clearances); exploring applications for passive components.

Business strategy

- TDK to drive mass production of proprietary ECAM technology through acquisition of US-based Fabric8Labs.
- Enter Thermal Management Solution Business, leverage TDK’s manufacturing capabilities to scale.
- Integrate ECAM technology to unlock new potential in Electronic Components and strengthen TDK’s product differentiation.

Application Cases

Rack-level

Server tray

Cold-plate

Insert (microchannel core)

Closing Remarks

From the President & CEO to Our Investors

Noboru Saito,
President & CEO

Conclusion

* RENDO(連動) is a Japanese word that roughly translates as alignment. It refers to the deepening of the alignment among various organizational activities.

RENDO(連動) = United

The “Three Forms of RENDO = United” that form the core of enhancing corporate value

“Uniting Internal and External Parties = United”

A Unique Organizational Culture as the Driver of “RENDO” = “United”

TDK Venture Spirit

Respect diversity TDK United

Functional Equality
