# TDK wins award for Excellence at the NIKKEI Integrated Report Award 2025

- TDK has received the award for Excellence at the NIKKEI Integrated Report Award for the fourth consecutive year

March 18, 2026

TDK Corporation (TSE:6762) announces that it has received the award for Excellence at the NIKKEI Integrated Report Award 2025. This is the fourth consecutive year that TDK has received this award.

Based on TDK's unique corporate culture of "functional equality," the report highlights how the efforts of TDK United team members (employees) contribute to maximizing FCF (free cash flow), reducing cost of capital, improving the expected growth rate, and enhancing corporate value.

In awarding this year's prize, the judges evaluated the following points:

- TDK United Report 2025 (renamed from "Integrated Report" this year to reflect a deliberate choice) is a highly polished report. It systematically organizes initiatives to enhance corporate value around the Long-term Vision "TDK Transformation." It clearly positions "TDK United," "functional equality," and "TDK Venture Spirit" as core corporate values, emphasizing respect for diversity and strengthening organizational capabilities throughout.
- It connects the Long-term Vision to growth strategies, key issues (materiality), capital policy, ESG, and governance as a value creation narrative. Presenting both planned and actual KPI values side-by-side demonstrates a high level of completeness as an integrated report.

In addition, for the "Excellent Materiality-focused Sustainability disclosure," TDK received 2 votes and for the "Most-improved Materiality-focused Sustainability disclosure," TDK received 2 votes by asset managers entrusted with domestic equity investments of the Government Pension Investment Fund (GPIF).

TDK continues to place importance on active information disclosure and mutual communication with stakeholders to enhance its corporate value.

TDK United Report 2025 can be downloaded on the TDK website.

### **NIKKEI Integrated Report Award**

The NIKKEI Integrated Report Award aims to contribute to the improvement of integrated reports by Japanese companies and promote constructive dialogue with investors. Under rigorous evaluation by fund managers from financial institutions, analysts, and academic experts, the awards recognize integrated reports that excel in corporate value enhancement narratives and financial/non-financial information disclosure. This year, the award received a record number of 504 applications from companies and organizations.

More details about the awards can be found on the website below.

### **Excellent materiality-focused sustainability disclosure selected by GPIF’s asset managers entrusted with domestic equity investment**

In the selection process, the GPIF has asked asset managers entrusted with domestic equity investments to identify up to 10 companies that provide “Excellent materiality-focused sustainability disclosure”—disclosures that were deemed helpful during engagement throughout the year—and up to 5 companies that provide “Most-improved materiality-focused sustainability disclosure.” The survey results were compiled into two lists, consisting of 89 companies recognized for Excellent materiality-focused sustainability disclosure and 66 companies recognized for most-improved materiality-focused sustainability disclosure.

### **About TDK Corporation**

TDK Corporation (TSE:6762) is a global technology company and innovation leader in the electronics industry, based in Tokyo, Japan. With the tagline “In Everything, Better” TDK aims to realize a better future across all aspects of life, industry, and society. For over 90 years, TDK has shaped the world from within; from the pioneering ferrite cores to cassette tapes that defined an era, to powering the digital age with advanced components, sensors, and batteries, leading the way towards a more sustainable future. United by TDK Venture Spirit, a start-up mentality built on visions, courage and mutual trust, TDK’s passionate team members around the globe pursue better—for ourselves, customers, partners, and the world. Today, the state-of-the-art technologies of TDK are in everything, from industrial applications, energy systems, electric vehicles, to smartphones and gaming, at the core of modern life. TDK’s comprehensive, innovative-driven portfolio includes cutting-edge passive components, sensors and sensor systems, power supplies, lithium-ion and solid-state batteries, magnetic heads, AI and enterprise software solutions, and more—featuring numerous market-leading products. These are marketed under the product brands TDK, EPCOS, InvenSense, Micronas, Tronics, TDK-Lambda, TDK SenseI, and ATL. Positioning the AI ecosystem as a key strategic area, TDK leverages its global network across the automotive, information and communication technology, and industrial equipment sectors to expand its business in a wide range of fields. In fiscal 2025, TDK posted total sales of USD 14.4 billion and employed about 105,000 people worldwide.
